

THE SECURITY
INSTITUTE

BTEC

The Security Institute Diploma in Security Management

This prestigious Diploma course enables learners to demonstrate a strategic understanding of security management. Taken online learners have the flexibility to complete the course from anywhere in the world, and have 12 months in which to complete it, working at their own pace.

Recognised by employers and departments internationally, the programme explores a host of subjects related to the risk, cause and prevention of crime. It encourages learners to explore a host of theoretically-founded concepts, from their own ideas and experiences.

Understanding Security

Understand the role of security managers, the purpose of security management; the principles of security; balancing measures with threats

Threats to Security

Disaster planning, management and recovery. Understand the threat of terrorism and countermeasures

Risk Management

Identify and appraise risks; the psychological and cultural approaches to risk management.

The Legal System

Understand the importance of employment law for security management; legislation and regulation of industrial disputes; the implications of employment law.

Management

Understand the theory of management in relation to security; importance of management skills. Identify the essential skills required for a security manager
